## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 3 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 1 has a layer for forming an oily film on skin, and Claim 3 states the layer is capable of forming an oily film on skin. If a layer is "for" something, which is intended use, then it has to be capable of something, therefore claim 3 is not further limiting claim 1, it is just rephrasing it.

### ***Claim Rejections - 35 USC § 102***

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Ehrnsperger et al. (6,160,200).

3. With respect to Claim 1-3, 6 and 8-10: Ehrnsperger discloses the use of an absorbent article (20) with a topsheet (24), backsheet (26) and core located in between (See figures 1-6). Ehrnsperger discloses the topsheet contains a layer which is a lotion composition (column 6, line 64 – column 7, line 17). It is the examiner's position that a lotion is fully capable of forming an oily layer on skin of a wearer. Ehrnsperger also discloses the use of a support layer (60) that covers the topsheet and is soluble in water at and above 35 degrees Celsius (column 10, lines 36-53, column 13, lines 1-23). It is the examiner position that due to the fact the support layer is

Art Unit: 3761

dissolvable in water, then this is 100% humidity, and therefore is promoted at 100% humidity, which is greater than 30%. Ehrnsperger discloses the support layer (60) is made of polyvinyl alcohol (column 11, lines 38-41).

4. With respect to Claims 4 and 5: See Ehrnsperger, column 12, lines 39-67.
5. With respect to Claim 7: See Ehrnsperger, column 9, lines 49-50, column 17, lines 18-55 and Figure 2.
6. With respect to Claim 11: Ehrnsperger discloses the support layer can comprise a body adhering composition which is formed of a polyethylene oxide (See Ehrnsperger, column 15, lines 58-67).

#### *Response to Arguments*

7. Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.

#### *Conclusion*

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 3761

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
